Cross-Boundary Landscape Restoration Workshop

All-lands Forest and Fire Management in Arizona, Colorado, and New Mexico

March 2–4, 2020
Hotel Andaluz, Albuquerque, New Mexico

THEME: Lessons learned from 10 years of collaborative cross-boundary forest landscape restoration, CFLRP and beyond.

OBJECTIVES:

- Share innovations as projects move from planning to implementation
- Develop recommendations for emerging collaborative landscape-scale projects
- Sharing successes and lessons-learned for working with partners on cross-jurisdictional efforts to restore large fire adapted landscapes.

DRAFT AGENDA

Monday March 2nd

1:00  Welcoming Statement and Workshop Goals

1:15  Management Perspective: Vicki Christiansen, Chief of the USDA Forest Service (Confirmed)

1:40  Research Perspective: Courtney Schultz, Director of the Public Lands Policy Group and Associate Professor at Colorado State University (Confirmed)

1:55  Facilitated Discussion:
- What do participants hope to learn from the conference
- Identify current strengths and gaps between research and management

2:20  Break with snacks

2:50  Jessica Robertson and Lindsay Buchanan (USFS Washington Office) – Lessons Learned from CFLRP site visits and program review (Invited)

3:00  Lessons learned in cross-boundary shared stewardship – peer to peer learning from practitioners and partners
- How do you define restoration success: achievements and challenges with collaboration, forest management, and landscape restoration

4:50  Adjourn

5:30-7:30  Poster Social and Dinner
Poster session to learn progress and challenges from collaborative forest landscape restoration science and management. Enjoy food, locally brewed beer and wine while getting to know colleagues and peers.

Agenda updated 12/19/2019
Cross-Boundary Landscape Restoration Workshop  
*All-lands Forest and Fire Management in Arizona, Colorado, and New Mexico*

**Tuesday March 3rd**

8:30  Opening and Agenda Review

8:35  Laura McCarthy, New Mexico State Forester (*Confirmed*)  
*Forest Restoration and Shared Stewardship in New Mexico*

9:00  Lessons learned in cross-boundary shared stewardship – peer to peer learning from practitioners and partners  
- How do you define restoration success: achievements and challenges with collaboration, forest management, and landscape restoration

10:20  Break with snacks

10:45  Lost in Translation: Translating Collaborative Planning for Implementers

11:00  Breakout Groups: Identify current strengths and gaps between research and management, and share creative science based solutions with partners.  
- Biomass Utilization (Han Sup Han, ERI, *Invited*)  
- Modernization and Efficiencies  
- Incorporating Adaptive Management  
- Socio-economic monitoring approaches  
- Implementing science-based restoration guidelines (Richard Reynolds and Mike Battaglia, RMRS, *Confirmed*)

12:15  Lunch Provided on site

1:30  Breakout Groups Continued: Identify current strengths and gaps between research and management, and share creative science based solutions with partners.  
- Biomass Utilization (Han Sup Han, ERI, *Invited*)  
- Modernization and Efficiencies  
- Incorporating Adaptive Management  
- Socio-economic monitoring approaches  
- Implementing science-based restoration guidelines (Richard Reynolds and Mike Battaglia, RMRS, *Confirmed*)

2:45  Break with snacks

3:15  Plenary: Breakout groups findings and discussion  
Modernization and Efficiencies: Moving from concept to implementation

5:00  Adjourn, Dinner on your own  

*Agenda updated 12/19/2019*
Cross-Boundary Landscape Restoration Workshop
All-lands Forest and Fire Management in Arizona, Colorado, and New Mexico

**Wednesday March 4th**

8:30  Opening and Agenda review

8:35  Plenary: Science Tools for Landscape-scale Planning
      - Spatial risk assessment and planning tools (Kit O’Conner and Jessica Hass, RMRS, *Invited*; Mike Caggiano and Ben Gannon, CFRI, *Invited*)
      - Shared stewardship example from states
      - Climate change and vulnerability assessment tools (Megan Friggens, RMRS, *Confirmed*)
      - LiDAR work for planning, wood characterization and monitoring

9:55  Discussion: Stakeholder experience taking science to actionable knowledge across large landscapes: successes and challenges

10:15 Break with snacks

10:45 Plenary: Moving forward
      - Summarizing and applying lessons learned to cross-boundary landscape restoration

12:00 Adjourn.
